cara highline

design by studio deberenn

As designers, we believe that Cara Highline is an absolutely stunning and simple design with a touch to fulfill the trends and privacy solutions with minimal design. The target was for all to feel comfortable at home, close your eyes and have a rest, and so the result was amazing.

As part of the Cara family, Cara Highline answers the need for privacy in open areas with a privacy addition. You can be in a lounge space, but still feel alone and comfortable while checking your mail or having a phone call. With its medium and high options, Highline is a perfect and comfy solution. Feel at home, close your eyes and have a rest.

- Cara carcass is made using 18 mm poplar plywood and 22.5 mm beech massive wood.
- CNC Router cuts poplar plywood into specific dimensioned shapes. Specific shapes are separated from the wood while straight plywood and beech wood are cut into pieces. Shaped and straight plywood and straight beech wood are glued, stapled and finally drilled together to provide a strong durable shell.
- Formation of arms is made using poplar plywood and beech wood while arm sides and carcass back are both covered with 4mm wood-fiber panel wood, creating a flat surface.
- Elastic belts and lining fabric are aligned onto the backrest and seat to prevent foam from cutting into the wood. Seat is covered with 36 density 10 cm foam while entire back side uses 32 density 5 cm soft foam with an exception of 22 density 1 cm grey foam layered below the 32 density foam under the bottom level. Outside edges are all covered with 22 density 1 cm grey foam while top edges are covered with 2 cm HLB foam to complete a soft and comfortable seating. Carcass center and arm rests are then wrapped with synthetic fiber.
- In creation of upholstery, CNC Fabric Cutter cuts a measured amount of fabric into specific dimensions. All fabric connections are then sewn and single stitched via needle machines. All sewing and lock stitching are made with extreme care. Different choices of fabric can be made for arms, inside and outside or even in between levels forming back side of the sofa.
- Fabric is then carefully and properly upholstered. Once upholstery is completed, the carcass and side arms are firmly and carefully drilled and attached together. A worker reviews and adjusts the alignment of carcass and side arms for a complete strong design. Bottom is then wrapped with lining fabric to give the sofa a final clean look.
- As being a member of the Cara family, same Cara legs are used in order to maintain continuity of the design. 3mm sheet metal is laser cut and can be chromed. The feet are screwed to the bottom of the chair, completing a comfortable sofa. As the height of the Cara High can be changed to medium or high, it permits a wide range of use.

- Powder coating options are given;
 - WHITE RAL 9016
 - ROUGH WHITE RAL 9016
 - BLACK RAL 9005
 - ROUGH BLACK RAL 9005
 - GREY RAL 9006
 - RED RAL 30
 - CHROME PP

Different codes and names regarding the base choices are given in the below table.
