An isley at the lounge, even three islets, brought us the idea to call this robust design 'Isley'.

It can be used as free standing units or linked together. Single, double or triple combinations provide you significant seating area at the lounges.

Isley lounge presents a ready to fly, ready to welcome you at the lounge motto. Unique asymmetric shapes are nicely turned to symmetry when you multiply the units. Isley with its wide size and shape can be super fit with all lounges and shopping malls. With its pleasant and easy geometry, Isley merges with the rest of the architectural elements defining each space, making you want to fly.

- Carcass is made of 18 mm poplar plywood, 22.5 mm beech massive wood and 3 mm thin light medium-density fiberboard (MDF).
- CNC Router cuts poplar plywood into specific dimensioned shapes. Specific shapes are separated from wood while straight plywood and beech wood are cut into straight pieces. Shaped top and bottom plywood, straight plywood and beech wood are then glued, stapled and finally drilled together to provide a strong durable shell. The sides are all closed with 3 mm thin light MDF wood to form a smooth and durable surface.
- Seat is aligned with 10 cm 36 density soft foam while all sides are fitted with 2 cm 22 density grey foam creating a smooth resting surface. The carcass is then wrapped with synthetic fiber, to prevent sliding of fabric.
- In creation of upholstery, CNC Fabric Cutter cuts a measured amount of fabric into specific dimensions. All fabric connections are then sewn; single stitched, double stitched, and zippers attached via needle machines. All sewing and lock stitching are made with extreme care. Fabric is then carefully upholstered to our wooden carcass.
- Once upholstery is complete, bottom is closed with lining fabric to give the sofa a final clean look.
- Feet are then made with 4 castors and attached to the sofa
